

INFINITE OPPORTUNITIES | GERMANY + INDIA 2011-2012

[CAEB] CONFERENCE - Architecture and Energy - New Strategies for the Building Sector BANGALORE

The CO₂ emitted into the atmosphere has reached worrying concentration levels, and is a contributory factor to devastating natural disasters. The building sector has great potential to reduce these emissions and their effects.

The German Federal Ministry of Transport, Building and Urban Development [BMVBS] is organizing a conference to present innovative approaches. These range from applying traditional building design elements to highly developed technologies and the implementation of energy efficiency in India and Germany. The conference on two days - choose between focus on residential and non-residential buildings...
